

Exposed Fire Dept. Connections

Angle Outlet Two-Way With Single Clapper
4" x 2 1/2" x 2 1/2"

M5715

4" (100mm) NPT x 2.5" (65mm) hose thread x 2.5" (65mm) hose thread cast brass angle body exposed fire department connection. The M5715 is a UL / ULC Listed and FM Approved swing clapper body that is used as an auxiliary connection and allows up to 500 GPM to supplement the system water supply for fire protection.

The swing clapper provides unobstructed waterway and the exposed design is an economical method of satisfying fire department inlet requirements. Specify regional hose thread for outlet.
